Headphone

- Switches the audio sound between speakers and headphones during the use of the headphones.

Menu item name	Setup	
Headphone	Mode1	This is intended to listen to the Monitor with the headphones alone. Once you connect the headphones, no sound will come out of the speakers.
	Mode2	Sound comes out of the speakers even after the headphones are connected. This is useful for two people with different needs (one having difficulty listening to the Monitor with the speakers alone and the other not wanting the volume of the speakers to be too loud) to enjoy watching the Monitor together.

NOTE

About volume adjustment during "Mode2"

- The speaker volume is adjusted by using the remote control.
- The headphone volume is adjusted by using the volume (+ / -) button on Monitor.
- Even if the **MUTE** button on the remote control is pressed, the volume of the headphones would not become "0".

Before Using USB Media

About USB memories attached to Monitor

How to attach / remove USB memory

- Do not remove the USB memory from Monitor while transferring files, viewing slide shows, switching screens or before exiting "**USB Media**" at the input selection menu.
- Do not insert and remove a USB memory repeatedly without any reason.
- When using a USB card reader, make sure to insert a memory card in the USB card reader before connecting it to the Monitor.
- Do not use any USB extension cable to connect USB memory into the USB terminal on the Monitor. The Monitor may fail to operate properly if you do so.
- Turn off the Monitor before removing the USB memory.

Enjoying Video

Playing video

3. Use the  button to select a video, and then press **ENTER**
 - The video will be played back.
 - If you select a video that you watched halfway through, the video will resume from where you left off.
 - If you select a folder, any videos in the folder will be displayed.
 - **RETURN** allows the preceding screen to be displayed.

NOTE

- If there is an invalid video file, an x-mark is displayed at the file.
- For a variable bit rate file, the playback time displayed may differ from the actual playback time. In addition, it may even end halfway through the progress bar.
- A video that cannot be played back on Monitor may be displayed.
- It is not ensured that any videos displayed can be properly played back.

Resume playback

- Up to 50 videos, which played back halfway through, can be retained by Monitor in reverse chronological order. If you select this, the video resumes from where you left it off the last time.
- Some types of videos may prevent you from resuming playback.

To play back from the beginning

- Use the up / down cursor button to select a video, and press **F2**.

How to operate during the playback of video

Operations during the playback of video

- You can perform operations such as pausing or playing a video.

▶	Plays the video.
⏸	Pauses the video.
⏮	Fast reverses the video. Press the button down again to speed up.(4 steps)
⏪	Returns to the beginning of the chapter being viewed now.
⏩	Fast forward the video. Press the button down again to speed up.(4 steps)
⏭	Locates the beginning of the next chapter.
■	Stops playback of the video, and returns to the video list screen.
-10 SEC	Rewinds the video by 10 seconds.
+30 SEC	Fast forward the video by about 30 seconds.

NOTE

- Some types of videos may prevent you from performing certain button operations.
- Available operations vary depending on the video viewed. Unavailable buttons are not displayed.
- Playback time can be navigated using the 10 sec REWIND / 30 SEC FF (approximate time) operations.
- During the speeding up or slowing down of playback, there may be no audio output.

Connecting Other Devices

Connecting 8K output compatible Device/Quad-screen display (4K or less)

- Connects the Monitor to 8K output (7680 × 4320 of resolution output) compatible equipment by using 4 HDMI cables.
 - When connecting an 8K output compatible device to the Monitor, use commercially available premium HDMI cables.
 - Connect the devices properly so that the output signal from the device can be displayed at the appropriate position. Video images from the HDMI input terminal are displayed at the position as shown on the right (default).
 - Multi-screen display by using 8K signal is not supported.
 - In MODE2, 8K display is possible whenever any input signal to INPUT 7 (A to D) is synchronized.
 - Under the factory default setting, INPUT7-A is set as the sound input.
 - To change the factory default setting, switch to INPUT7, select "**Setup**" - " (Option)" - "**Terminal setting**" - "**INPUT7 audio setting**" from the Menu, and then select input for audio sound.
 - Read the operation manual on the device to be connected to the Monitor as well.
- ◆ Important ◆
- Use / connect four HDMI cables of the same type and brand, otherwise performance cannot be guaranteed.
 - In Mode2, input the format 3840×2160 (24Hz, 25Hz, 30Hz, 50Hz, 60Hz) to each terminal of INPUT 7 (A to D). If any format other than the above is input, the video or picture may be distorted.

Supported format in Mode2

- 7680 × 4320 (24Hz, 25Hz, 30Hz, 50Hz, 60Hz)

How to switch

- Press **INPUT** on the remote control. During the display of the input change menu, use the **▲/▼** to select **"INPUT7"**, and press **ENTER**.

Indication when 8K video input is used

- When a synchronizing 8K signal is input to INPUT7 (A to D), the video information is displayed as **"4320p"**.

NOTE

- **"Out of range"** message will be displayed if an unsupported signal is input. In such situation, refer to the operation manual of the connected device and change to the supported signal.
- Video will not be displayed properly if input signals are not synchronized.

How to change the mode

- Each time you press **PIP/PbyP**, the Mode changes in the following order.
Mode1 -> Mode2 -> Mode3 -> Mode4 -> Mode1...

How to change the display in Mode1

- Press the button for the input you want to display.
INPUT7-A:F1, INPUT7-B:F2, INPUT7-C:F3, INPUT7-D:F4

Connecting Other Devices

Connecting 8K output compatible Device/Quad-screen display (4K or less)

How to change the display position in Mode3/4

- In mode 3, press the button for the input you want to display at the top left. The display position of the selected screen and the upper left screen change.
- In mode 4, press the button for the input you want to display at the left side. The display position of the selected screen and the left side screen change.

INPUT7-A:F1, INPUT7-B:F2, INPUT7-C:F3, INPUT7-D:F4

- To return initial display position, press **CLEAR**.

Supported audio sound signals

- Type: Linear PCM
- Sampling frequency: 48kHz / 44.1kHz / 32kHz

How to change the input audio sound in Mode2/3/4

- Press **MENU**, followed by **▲▼◀▶** and **ENTER** to select "**Setup**" - **Option** - "**Terminal setting**" - "**INPUT7 audio setting**", then select input for audio sound.

NOTE

- When "**Audio input terminal**" has been selected for "**INPUT7 audio setting**", no sound will come out of the Monitor if you connect between the Monitor and a typical HDMI compatible device using an HDMI cable instead of an analog audio cable. (An analog audio cable needs to be connected)
To connect the Monitor to a HDMI compatible device using an HDMI cable alone, select the input to which the device has been connected in "**INPUT7 audio setting**".

Viewing HDR Video (INPUT1, INPUT7, INPUT8)

- This Monitor provides support for HDR (High Dynamic Range) supported by "ULTRA HD Blu-ray™". Ever-more brightness information is included on HDR video, making it possible to express the gradation of bright and dark areas in the HDR video. This was previously impossible to express in videos such as ones with a high contrast between bright and dark areas, and thereby offering high-contrast, realistic video images.
- To view a HDR video using INPUT 1 of the Monitor, connect a HDR-capable device to INPUT 1, and set "**Suitable mode for signals**" to "**Full mode (HDR)**".
- When **INPUT7** or **8** is selected, you can use a HDR compatible device with the default setting.
 1. Press **INPUT**, use the **▲/▼** to select "**INPUT 1**", and then press **ENTER**
 2. Press **MENU** to display the Menu, press **▲/▼/◀/▶** to select "**Setup**", and then press **ENTER**
 3. Press **▲/▼/◀/▶** to select "**Option**" - "**Terminal setting**", and press **ENTER**
 4. Press **▲/▼** to select "**Suitable mode for signals**", and press **ENTER**
 5. Press **▲/▼** to select "**Full mode (HDR)**", and press **ENTER**

NOTE

- During "**Full mode (HDR)**" and "**Backlight**" (page [3-9](#)) can be adjusted respectively for HDR and SDR video contents.
- HDR and SDR video content signals are identified automatically.

Using the HDMI CEC

What is HDMI CEC (Consumer Electronics Control)?

- HDMI terminals are not limited to video or audio signals but it permits control signals, which allow for device-to-device control, which is transmitted through the HDMI cable. You can control each other between the compatible devices.

NOTE

- To operate HDMI CEC using the remote control, point the remote control at the Monitor.

Connecting Recorder, Player, etc.

For a device with an HDMI output terminal

- HDMI terminals allow video and audio signals to be transmitted through an HDMI-certified cable (commercial product).
- Be sure to use a commercially available HDMI-certified product.
If you use a cable that is not HDMI-certified, a malfunction may occur, such as a failure to display a video or operate HDMI CEC, no sound coming from the Monitor, or a noise in video.
- If any of the following apply, use a Premium HDMI cable.
 - When connecting to a device that is 4K2K output compatible
 - When inputting a video signal (1080p)
- For information on connection to INPUT 7 (8K signal), see page [5-2](#).

- When playing back a 4K60p video or an HDR video from ULTRA HD Blu-ray™, connect to INPUT1 of the Monitor through a 18Gbps-capable cable certified as a "premium HDMI cable".

7. Troubleshooting

Connecting Other Devices

Connecting Recorder, Player, etc.

For a device with an HDMI output terminal (INPUT 1 / 2 / 3 / 4)

Supported video signals

- 3840 × 2160 (24Hz/25Hz/30Hz/50Hz/60Hz^{*}), 1080p (24Hz/30Hz/50Hz/60Hz), 720p (30Hz/50Hz/60Hz), 1080i, 576p, 576i, 480p, 480i, VGA, SVGA, XGA, WXGA, SXGA, SXGA+

^{*}Only INPUT 1 supports for 4K50p/60p (4:2:2, 4:4:4) signals.

Supported audio sound signals

- Type: Linear PCM (2ch)^{*1}, AAC^{*2}, Dolby Digital, Dolby Digital Plus
sampling frequency: 48kHz / 44.1kHz / 32kHz

^{*1} Only Linear PCN is supported (INPUT 7) during viewing 8K video.

^{*2} Since digital broadcasting makes efficient use of limited radio waves, videos or sounds are compressed before being transmitted.

AAC is an audio compression format that is used in digital broadcasting, and that, in spite of a high compression ratio, can achieve high sound quality and even support multi-channel audio (5.1 channel surround, etc.).

NOTE

- If a device that is not HDMI CEC compatible is connected to the monitor, it may turn on and off, or switch channels on its own. In this case, set "**CEC control**" to "**Off**". (page [3-31](#))

Operating the Monitor Using a PC (IP control)

Connecting the Monitor and PC

- The Monitor is connected using a commercially available LAN cable.

NOTE

- When you use a network, your communication data is exposed to the risks of being stolen or illegally accessed. To avoid these risks, you need to use this monitor in a secure network environment.

How to communicate

- Send a control command from PC. The Monitor operates according to the transmitted command, and sends a response message back to PC.
- Do not send more than one command at the same time. Send next command from PC after it receives the successful return value (OK).

Command (PC to Monitor)

Response (Monitor to PC)

When successful

When unsuccessful (in the event of a communication or command error)

Command and argument

- In the "B" part field, characters should be entered left-aligned, and fill the rest of the field length with spaces. (Must be 4 characters.) If it is outside the settable range, "ERR" is returned.

Argument examples

Enter 0 → 0 space space space

Enter -30 → - 3 0 space

Enter 100 → 1 0 0 space

Enter 55 → 0 0 5 5

- Any argument shown as "-" in the command list on pages [6-4](#) to [6-7](#) can take on any one of the followings: "0" to "9", "-" (minus), space or "?"
- Certain commands return the currently set value whenever "?" is assigned to their arguments.

Argument examples

? space space space

Troubleshooting

If You Suspect a Problem

General

What if	Where to check	Reference page
There is no video and sound output from the Monitor	Is the power plug unplugged from the outlet?	The operation manual supplied with the Monitor "Connecting AC Cord"
	Is the POWER lamp lit white?	2-2
	Is the input changed to a proper source to permit a video from an external device to be played on the Monitor?	5-16 to 5-17
	Is any connecting cable disconnected?	—
The remote control does not operate	Is the POWER lamp lit white?	2-2
	Isn't the polarity (+, -) of the dry battery reversed?	The operation manual supplied with the Monitor "Preparation and How to Use Remote Control Unit"
	Are the dry batteries for the remote control drained? The higher the use frequency is, the faster the dry batteries may be drained. Whenever there is a sign of draining of a dry battery, such as when the Monitor does not respond to the remote control, replace the dry battery with a new one early.	The operation manual supplied with the Monitor "Preparation and How to Use Remote Control Unit"
	Do you point the remote control toward the light receiving section of the Monitor when using it?	The operation manual supplied with the Monitor "Preparation and How to Use Remote Control Unit"
	You will have difficulty operating the remote control if any of the following apply: <ul style="list-style-type: none"> • There is an obstacle between the remote control and the remote control light receiving section of the Monitor. • The remote control light receiving section is exposed to direct sunlight or intensified light. • Try to angle the light. • There is a light source, such as a fluorescent, near the Monitor. • A battery terminal is oxidized (darkened)? • The room temperature is extremely low. 	—

Troubleshooting

If You Suspect a Problem

General

What if	Where to check	Reference page
 <p>Video appears on Monitor but no sound comes out of it</p>	Is the volume control set to the minimum level?	2-2
	Is it set to "Mute"?	—
	Is the headphone left plugged into the headphone terminal?	1-2
The audio sound differs in volume level from one input source to another	Because the input sound level may vary depending on the device connected or the disk played back, the volume can be set per input. Set the volume control for each input.	2-2
<p>Video image from a BD player or external device does not appear, or stopped appearing, on the Monitor</p>	Is the external device unplugged?	—
	Is the external device turned on?	—
	Have you selected the input to which the external device is connected?	5-16 to 5-17
	For INPUT 5 or INPUT 6, due to the provisions of Advanced Access Content System (AACS), BD videos (commercial blue-ray software) from certain external devices connected to the INPUT cannot be played back on the Monitor.	—
 <p>Sound comes out of the Monitor but no video appears on it</p>	Due to copyright restrictions, videos from certain devices fail to appear on Monitor unless the devices are directly connected to the Monitor through HDMI cable.	—
	Is Audio only set to "On"?	3-24
 <p>Faded poorly tinted</p>	Is the video cable disconnected?	5-12
	Are " Color " and " Tint " for video picture properly adjusted?	3-10
	Due to the viewing angle characteristics of the LC panel, when viewed from an oblique direction, some video pictures may look faded or have a different color tone. This is not a failure.	—

	Check " AV Mode ".	3-8
Underexposure	Adjust " Backlight ", " Brightness ", or " Advanced " - " Gamma adjustment ".	3-9 , 3-15
The display screen increases or decreases in size	Is the Auto Wide function set to " Yes "? Change the setting to " No ".	3-42
The screen flickers or has poor resolution or noise	Set " Noise Reduction " for " Advanced " to " Auto ", " High ", " Middle " or " Low ".	3-16
The monitor gets warm/hot at the top	This is because the Monitor is structured to allow the air heated with the heat from internal circuits to naturally flow out through its top. When the Monitor increases abnormally in temperature, the letters " Temperature " or " Temperature of monitor " blink at the bottom right corner of the screen, causing it to automatically turn off afterwards.	—
The letters " Temperature " or " Temperature of monitor " blink at the bottom right corner of the screen. Subsequent to that, the Monitor turns off automatically.	This is due to an increase in the temperature of the Monitor. Eliminate the cause of the temperature increase.	—
	Check the installation condition or location of the Monitor for potential causes of temperature increase. Install the Monitor so that ventilation holes in its rear are not blocked.	—
	Frequently eliminate any dust settling inside the Monitor or ventilation holes if it is possible to dust from the outside of Monitor.	—

Troubleshooting

If You Suspect a Problem

General

What if	Where to check	Reference page
Input change does not allow selection	Is the input skip set to "No"?	3-37
The power turns off automatically	Check if the Monitor is in the mode where it is turned off automatically.	—

8K input

What if	Where to check	Reference page
Not shown as 4320p	Check if four HDMI cables are inserted into A to D of INPUT 7. Check the resolution of the output device.	5-1 to 5-3
No video appears	Any connections to HDMI 1 to 4?	5-1 to 5-2
No sound is coming out	Go to " INPUT7 audio setting " where you should select the audio input terminal used. The compatible format is Linear PCM only.	5-4

If any problem persists after you try the corresponding solution above, be sure to unplug the power plug and then contact your local distributor.

Troubleshooting

If Error Message Appears

Message concerning USB Media

On-screen error message example	Solution
The power supply requirement of the connected USB device is too large. After turning power off the Monitor, connect only necessary USB devices.	USB inrush current has occurred. It can occur when multiple USB devices are connected to the Monitor. Turn off the Monitor, and then disconnect any unnecessary USB devices.
Cannot display the data.	Data in any format other than JPEG, which is compatible with the Monitor, or corrupted data cannot be displayed.

Troubleshooting

What If

If the Monitor cannot be operated

- If the Monitor is exposed to intensive external noise (very large amount of static electricity, source voltage error caused by lighting strike, etc.), or if you operate the Monitor in an improper manner, an error may result, such as failure to operate or control the Monitor.
- In such a case, press the power button on the Monitor to temporarily turn the power off, and then turn the power back on to retry an operation that previously failed.
- If you still fail to operate the Monitor even after turning the power on again, keep pressing the power button on the Monitor for at least five seconds. That turns off the Monitor. Wait about a minute before pressing the power button to turn the Monitor back on, and then retry the operation again. Even after these button operations above, setting items such as menu are retained.

NOTE

Since data is loaded into the Monitor immediately after it is turned back on, it takes some time before a screen is displayed.

DDC (Plug & Play)

- The Monitor supports VESA Display Data Channel (DDC) Standard.
- DDC is a signal standard for Plug and Play between display and PC.
- Information such as the one about resolution, etc. is transmitted between the display and the PC.
- This feature is enabled when PC is DDC-compatible and set to detect a Plug and Play monitor.
- There are different types of DDC, depending on the communication system.
- The Monitor is DDC2B-compliant.

Software License

Information on the open-source software license.

Software composition

The software included in this product is comprised of various software components whose individual copyrights are held by third parties.

This product also makes use of freely distributed software and software components whose copyrights are held by third parties. These include software components covered by a GNU General Public License (hereafter GPL), a GNU Lesser General Public License (hereafter LGPL) or other license agreement.

Obtaining source code

Some of the open source software licensors require the distributor to provide the source code with the executable software components. GPL and LGPL include similar requirements. For information on obtaining the source code for the open source software and for obtaining the GPL, LGPL, and other license agreement information, visit the following website.

https://jp.sharp/business/lcd-display/support/download/source_e.html

We are unable to answer any questions about the source code for the open source software. The source code for the software components whose copyrights are held by SHARP is not distributed.
